

## Bringing Connected Experiences to Life

We invent, deliver and support solutions that enable venues to connect visitors to their world and provide with memorable moments that make them want to come back or stay longer.

The world's leading brands in hospitality, multi-family housing, retail, education and other industries turn to us to create experiences that **connect**, **manage** and **engage** their customers, guests, tenants and students. Our digital connectivity and engagement solutions help them realize new revenue streams, streamline and scale their operations, and foster lasting loyalty.

Trust Nomadix to help you redefine your brand with cloud-managed connectivity, authentication and visitor engagement solutions.

Nomadix was founded in 1998 by Dr. Leonard Kleinrock, who developed the vision of “nomadic computing” to give mobile users the freedom to connect to the internet at high speeds wherever they may be. Nomadix developed technology to enable “guests” to authenticate and sign onto host networks called Visitor-Based Networks (VBNs), solving the industry-wide challenge that made guest Wi-Fi possible.
