

BRINGING CONNECTIVITY TO THE CLASSROOM

In today's educational landscape, K-12 schools are at the crossroads of learning and digital technology, with secure and reliable school Wi-Fi playing a crucial role in modern educational practices. However, only 74% of school districts across the US are now providing internet access at speeds that are sufficient to support digital learning in their classrooms every day - impacting 27.1 million students, an increase of over 5 million students since 2022, as reported by Connected Nation*.

Recognizing this pivotal shift, schools are looking to modernize their wireless infrastructure, signaling a transformation in how they leverage technology for meaningful learning experiences and connectivity.

Secure authentication and onboarding are vital for robust digital infrastructure, safeguarding data, ensuring privacy compliance and preventing unauthorized access. As education increasingly relies on digital tools, secure onboarding facilitates seamless connectivity for all users.

Nomadix and our Partners help SLED institutions with their digital transformation, seeing it as an investment in preparing students for a future where digital connectivity is crucial. The educational experience, Nomadix aims to equip students for tomorrow's challenges and opportunities.

Nomadix is a member of **NASTD**. Nomadix Networks is available through government funding programs, such as **American Rescue Plan** and **E-Rate**.

Connectivity for K-12 Schools

Quality & Simplicity

- High-performing products
- Straightforward portfolio
- Ease of management

Affordability

- Attractive, flexible pricing
- Energy efficient
- Rapid onboarding

Better Together

- Complementary portfolio
- Trusted, single source supplier
- Ideal for school-wide deployment

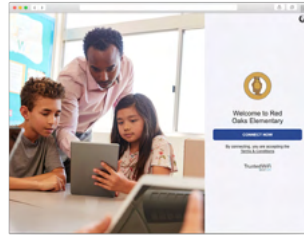

NOMADIX PRODUCTS AND SOLUTIONS

AUTHENTICATION AND ONBOARDING

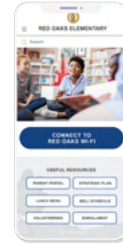

INTERNET GATEWAYS

- Dynamic bandwidth management
- High availability and load balancing
- Native firewall and multi-services
- Personalized user experiences

TRUSTED WIFI

- Universal captive portal
- Carrier-grade scalability
- Customizable landing pages
- Simple to configure and use

PASSPOINT

- Hotspot 2.0
- Next generation onboarding
- Frictionless and roaming
- Upmost security and privacy

NETWORKING, COMMUNICATION AND SAFETY SOLUTIONS

NETWORKS

- Switches, wireless access points and controllers
- Secure for education
- Power over Ethernet
- Cloud management

CLOUD TELEPHONY

- Disruptive approach
- Hybrid solution
- Optimized service
- Modern and budget friendly

ALERTS

- Protect staff across campus
- Monitor Wi-Fi experience
- Panic button and fall detection
- Lightweight architecture and onboarding
