

NOMADIX®

MULTI-TENANT

POWERING THE CONNECTED COMMUNITY

Managed Wi-Fi by Nomadix is a powerful solution that equips multi-dwelling unit (MDU) communities with a smart, secure network that's accessible property-wide. The internet is the most desired amenity, and by offering this service, properties drastically boost tenant satisfaction while opening new revenue streams and increasing operational efficiencies.

Working from home, distance learning, streaming, and gaming have become the norm. It's time to rethink how Wi-Fi is offered and give residents the bandwidth and access they require.

By building a backbone to connect Wi-Fi-enabled IoT devices, properties gain additional insight, control, security, resident safety, as well as energy management, leak detection, and machine monitoring. As a building owner, adopting Nomadix Managed Wi-Fi not only adds enterprise connectivity but, more importantly, leads to higher net operating incomes and increased asset values.

WHY MANAGED WI-FI?

BECOME A SMART COMMUNITY

CREATE NEW REVENUE STREAMS

DRIVE OPERATIONAL EFFICIENCIES

BOOST TENANT SATISFACTION

Student Housing

Apartments Condominiums

Assisted & Senior Living

Shared Office Space

BACKBONE OF PROPERTY-WIDE CONNECTIVITY

GIVE TENANTS:

- Day 1, instant access
- Individual network passwords/controls
- Fast, high-quality connectivity with bandwidth management
- Seamless access across the property

GIVE PROPERTY MANAGERS:

- Simplified onboarding
- Easy management of residents
- Robust controls over accounts & billing
- Enhanced efficiency across property
