

Bringing Connected Experiences to Life

Cloud-managed connectivity, user onboarding and visitor engagement solutions for every industry.

We invent, deliver and support solutions that enable venues to connect visitors to their world and create memorable moments that make them want to come back or stay longer.

Founded in 1998 Dr. Leonard Kleinrock, the pioneer of “nomadic computing,” Nomadix created the technology that made secure Wi-Fi possible. Today, as part of the ASSA ABLOY group, we continue to lead with secure, reliable connectivity and engagement solutions for venues across the globe.

For over two decades, Nomadix has delivered innovative solutions to the world's leading brands across multiple verticals. Our solutions scale with your business so you can focus on delivering the best possible experiences to the people you serve.

Who We Serve

Hospitality | Multi-Tenant | Education | Government | Large Venues | Smart Cities

Partnering With Nomadix Brings Multi-Faceted Benefits

Financial

- Competitive solutions
- New revenues
- Easy onboarding

Technical

- Innovative solutions
- End-to-end portfolio
- Industry focused

Support

- In-house experts
- Partner Portal
- Certification program

Marketing

- Events support
- Collateral/assets
- Co-marketing

Financially, you'll gain access to competitive solutions that open doors to new revenue streams with minimal onboarding costs. We offer innovative, industry-focused products through an end-to-end portfolio. Moreover, our support benefits include in-house experts, ample resources and a comprehensive certification program. In addition, we also provide marketing support through events assistance, collateral and co-marketing opportunities.

Nomadix Solutions Portfolio
